

CS Options, Payments, Measures

Note on CS payment rates:

Below is the full list of current Countryside Stewardship payment rates which are applicable to FiPL projects. Once a grant has been offered, these payment rates will not change whilst the project is ongoing, the payment rate given when the agreement is made will be the payment rate throughout the project. For more information please go to <https://www.gov.uk/countryside-stewardship-grants>

A small number of payments for capital items are based on the **actual cost** and are paid as a % of the cost (known as the intervention rate). Applicants will need to provide quotes for these particular capital items and must get a minimum of three quotes in writing. In exceptional circumstances involving highly specialised works fewer than three quotations may be accepted, but this must be agreed in writing by the Protected Landscape team in advance.

Green highlighted payment rates have increased for 2023 and red highlighted payment rates have decreased for 2023.
