

EXMOOR NATIONAL PARK **PATH DIVERSION AHEAD**

Between May 31st and November 31st 2024

Exmoor National Park Authority is building a new bridge across the River Barle, which will allow for a secure, sustainable route between Tarr Steps and Withypool at any time of the year.

It is a large construction project taking place in a difficult and sensitive location. For public safety we are having to close some sections of the paths that run alongside the river until December 2024.

Please note that the circular walk from Tarr Steps and the footbridge at Hinds Pit are still open.
